From The Commissioner

As a parent of four myself, I want understandable information that helps me support my children in class and at home. This report gives you details on how well your child learned this year's academic material in school and guidance on how you can help your child even more at home. The results you see also allow you to know if your child is on track and gaining the grade-level knowledge to be ready for college, a career, or the military.

This year's STAAR tests have been redesigned with the input of many Texas teachers to look more like how your child learns in the classroom and to emphasize writing. As a parent, you have a right to see your child's STAAR results, including every question that was scored and how your child answered it. I invite you to review these results and learn more.

Mike Morath, Commissioner of Education

What the Results Mean

This report shows how well your child did on the assessment. There are four levels of performance.

MASTERS GRADE LEVEL

Mastery of the course knowledge and skills is shown—student is on track for college and career readiness.

MEETS GRADE LEVEL

Strong knowledge of course content—student is prepared to progress to the next grade.

APPROACHES GRADE LEVEL

Some knowledge of course content but may be missing critical elements—student needs additional support in the coming year.

DID NOT MEET GRADE LEVEL

No basic understanding of course expectations is shown—student may need significant support in the coming year.

Maximize Time During Parent Teacher Conferences

Sample Questions to Ask the Teacher:

- What do you see as my child's strengths?
- What does my child seem to be most interested in at school?
- Does my child get along well with his or her classmates?
- What is the most important thing that I can be doing to prepare my child for middle school?
- Is my child giving his or her best effort?
- What could my child be doing that he or she is not already doing?
- What do you think are the biggest challenges for my child, and how can I help him or her with those challenges?

Performance: 4th Grade

RESOURCES TAILORED FOR ABHIRAJ

Reading Language Arts

Strategies to improve your child's grade 4 reading language arts understanding

Reading

- Encourage your child to use a variety of engagement strategies while he or she reads fiction texts. These strategies might include highlighting words or sentences, using sticky notes to mark significant actions, and keeping a question or summary log.
- Find two different kinds of texts, such as a memoir and a biography, about a person whom your child finds interesting. Read these texts together and discuss their characteristics.

Writing

- Have your child write a letter or note requesting information from someone. For example, your child might write to his or her favorite author or a family member with questions.
- Ask your child to think about a career that he or she is interested in. Have your child write a personal narrative describing his or her reasons for choosing that career.

Mathematics

Strategies to improve your child's grade 4 math understanding

Numerical Representations and Relationships

- Have your child generate equivalent fractions for all the fractions found in a recipe. Have him or her compare two of the fractions with different numerators and denominators to show whether they are equal to, less than, or greater than each other.
- Using decimal numbers found in everyday life, have your child create a number line to show where the numbers would be placed.

Computations and Algebraic Relationships

- Have your child add two fractions with the same denominator. Then ask him or her to represent that sum on a number line.
- Using the total on a sales receipt, have your child divide the total by the number of people in your household to find the cost per person.

Geometry and Measurement

- Have your child measure the dimensions of different rooms in a house or apartment and determine the perimeter of those rooms. Have him or her explain how the measurements can also be used to find the area of the room.

Data Analysis and Personal Financial Literacy

- Have your child plan a real or imaginary bake sale. Ask him or her to identify the expenses and determine the amount of money needed to make a profit.
- Have your child create a budget based on a given amount of money. Have him or her identify which items would be considered fixed expenses and which items would be variable expenses.
