From The Commissioner

As a parent of four myself, I want understandable information that helps me support my children in class and at home. This report gives you details on how well your child learned this year's academic material in school and guidance on how you can help your child even more at home. The results you see also allow you to know if your child is on track and gaining the grade-level knowledge to be ready for college, a career, or the military.

The STAAR tests have been redesigned with the input of many Texas teachers to look more like how your child learns in the classroom and to emphasize writing. As a parent, you have a right to see your child's STAAR results, including every question that was scored and how your child answered it. I invite you to review these results and learn more.

Mike Morath, Commissioner of Education

What the Results Mean

This report shows how well your child did on the assessment. There are four levels of performance.

MASTERS GRADE LEVEL

Mastery of the course knowledge and skills is shown—student is on track for college and career readiness.

MEETS GRADE LEVEL

Strong knowledge of course content—student is prepared to progress to the next grade.

APPROACHES GRADE LEVEL

Some knowledge of course content but may be missing critical elements—student needs additional support in the coming year.

DID NOT MEET GRADE LEVEL

No basic understanding of course expectations is shown—student may need significant support in the coming year.

Maximize Time During Parent Teacher Conferences

Sample Questions to Ask the Teacher:

- What do you see as my child's strengths?
- What does my child seem to be most interested in at school?
- Does my child get along well with his or her classmates?
- What is the most important thing that I can be doing to prepare my child for middle school?
- Is my child giving his or her best effort?
- What could my child be doing that he or she is not already doing?
- What do you think are the biggest challenges for my child, and how can I help him or her with those challenges?

Performance: 5th Grade

RESOURCES TAILORED FOR ABHIRAJ

Reading Language Arts

Strategies to improve your child's grade 5 reading language arts understanding

Reading

- Ask your child to read a fairy tale or folktale. After reading it, have him or her identify and describe the lesson of the story. Challenge your child to find excerpts from the text that support the lesson.
- Read a newspaper or magazine with your child at breakfast or on the weekend. Discuss the articles you read. Talk about how they are written differently than fiction and how the publication is organized by subject area.

Writing

- Ask your child to write an informational article about his or her favorite after-school activity. Have your child create text and graphic features that enhance the information.
- Have your child write a book review after reading a book. Find an outlet for your child to "publish" the book review, such as the family or school newsletter or at the school library.

Here are some books that are within ABHIRAJ's reading complexity range as measured by Lexile. Depending on ABHIRAJ's interest and what you determine is appropriate for your family, these may be good options to encourage your child to read more.

Mathematics

Strategies to improve your child's grade 5 math understanding

Numerical Representations and Relationships

- Gather a set of objects. Have your child arrange them in different numbers of rows and columns and identify whether the number of objects is prime or composite (prime numbers can only be put in one row or one column without a remainder) and identify the number of rows, columns, and objects each time. Repeat using different numbers of objects.
- Have your child order numbers that he or she sees in everyday life.

Computations and Algebraic Relationships

- When cooking, ask your child how much of each ingredient is needed if you were to double the recipe, cut it in half, or cut it in thirds.
- Before you get the bill or checkout at a restaurant or store, have your child estimate the total cost of your purchases. Compare against the actual total to see how close the estimation was.

Geometry and Measurement

- Have your child find the area of each room in your home using a tape measure.
- Have your child determine how tall each member of your family is in centimeters/meters or inches/feet.

Data Analysis and Personal Financial Literacy

- Give your child a predetermined amount of money. Ask what the best purchasing decision is and why. For example, say we have \$20 to feed five people for dinner. What can we buy that will feed all of us?
- Have your child create a graph that shows the distance traveled to school each week. Ask him or her to determine the distance traveled in one month, one year, three years, etc.
