From the Commissioner

As a parent of four myself, I want understandable information that helps me support my children in class and at home. This report gives you details on how well your child learned this year's academic material in school and guidance on how you can help your child even more at home. The results you see also allow you to know if your child is on track and gaining the grade-level knowledge to be ready for college, a career, or the military.

The STAAR tests have been redesigned with the input of many Texas teachers to look more like how your child learns in the classroom and to emphasize writing. As a parent, you have a right to see your child's STAAR results, including every question that was scored and how your child answered it. I invite you to review these results and learn more.

Mike Morath, Commissioner of Education

Maximize Time During Parent Teacher Conferences

Sample questions to ask the teacher:

- What do you see as my child's strengths?
- What does my child seem to be most interested in at school?
- Does my child get along well with his or her classmates?
- What is the most important thing that I can be doing to prepare my child for high school?
- Is my child giving his or her best effort?
- What could my child be doing that he or she is not already doing?
- What do you think are the biggest challenges for my child, and how can I help him or her with those challenges?

What the Results Mean

This report shows how well your child did on STAAR. There are four levels of performance.

MASTERS GRADE LEVEL

Mastery of course knowledge and skills is shown—student is on track for college and career readiness.

MEETS GRADE LEVEL

Strong knowledge of course content—student is prepared to progress to the next grade.

APPROACHES GRADE LEVEL

Some knowledge of course content but may be missing critical elements—student needs additional support in the coming year.

DID NOT MEET GRADE LEVEL

No basic understanding of course expectations is shown—student may need significant support in the coming year.

Performance: 6th Grade

29 total points

Writing

24 point(s) earned out of
27 total points

Mathematics

Test Date: Spring 2025

MASTERS GRADE LEVEL

Your child scored the same as or better than 98% of all students who took this test.

SCORE
2137

Knowledge and Skills Categories for Mathematics

Numerical
Representations
and Relationships

10 point(s) earned out of
11 total points

Computations and
Algebraic
Relationships

15 point(s) earned out of
15 total points

Geometry and
Measurement

6 point(s) earned out of
7 total points

Data Analysis and
Personal Financial
Literacy

10 point(s) earned out of
10 total points

★ Based on your child's score, your child is ready to meaningfully engage in advanced math course material. This is one of many tools to help gauge their readiness for advanced math.

RESOURCES TAILORED FOR ABHIRAJ

Reading Language Arts

Strategies to improve your child's grade 6 reading language arts understanding

Reading

- The next time you are putting together a piece of furniture or following a manual for a piece of equipment around your home, have your child read the directions to you and help you follow them step by step. If the instructions have only images, have your child write instructions that match the images or actions.
- Help your child list some common literary themes, such as the importance of justice, the value of teamwork, or the challenge of overcoming fears. Search for books or movies that share some of those themes. Read the books or watch the movies together and discuss how the themes are developed.

Writing

- Ask your child to select one school rule that he or she finds important or troublesome. Have your child write a persuasive paper in favor of the rule, presenting arguments and evidence to support it. Then have your child write another persuasive paper opposing the rule, along with evidence to support why it should be changed.
- Cook a family recipe with your child and discuss its history. Have your child write about the recipe and its history in your family.

Mathematics

Strategies to improve your child's grade 6 math understanding

Numerical Representations and Relationships

- Using an advertisement, ask your child to determine the percent to be paid in either a fraction or decimal by subtracting the discount from the total cost. Have your child convert the fraction or percent to be paid into both forms. For example, 1/3 off means 2/3 the price would need to be paid, which is approximately be 67% or 0.67.

Computations and Algebraic Relationships

- Have your child research a profit and loss statement. Explain which numbers would be positive and which would be negative. Have them double check the math in the statement.

Geometry and Measurement

- Have your child measure the height, length, and width of boxes he or she finds. Have him or her calculate the volume then convert the measurements to smaller or larger units and recalculate the volume. Ask him or her to compare the measurements and volumes. See if he or she can spot a pattern.

Data Analysis and Personal Financial Literacy

- Have your child measure two similar sets of things in everyday life, such as the leaves from two different plants. Have him or her create box and whisker plots with both sets of data and describe what those plots tell about the two sets.

Here are some books that are within ABHIRAJ's reading complexity range as measured by Lexile. Depending on ABHIRAJ's interest and what you determine is appropriate for your family, these may be good options to encourage your child to read more.
