From the Commissioner

As a parent of four myself, I want understandable information that helps me support my children in class and at home. This report gives you details on how well your child learned this year's academic material in school and guidance on how you can help your child even more at home. The results you see also allow you to know if your child is on track and gaining the grade-level knowledge to be ready for college, a career, or the military.

The STAAR tests have been redesigned with the input of many Texas teachers to look more like how your child learns in the classroom and to emphasize writing. As a parent, you have a right to see your child's STAAR results, including every question that was scored and how your child answered it. I invite you to review these results and learn more.

Mike Morath, Commissioner of Education

What the Results Mean

This report shows how well your child did on STAAR. There are four levels of performance.

MASTERS GRADE LEVEL

Mastery of course knowledge and skills is shown—student is on track for college and career readiness.

MEETS GRADE LEVEL

Strong knowledge of course content is shown—student is prepared to progress to the next grade.

APPROACHES GRADE LEVEL

Some knowledge of course content is shown but may be missing critical elements—student needs additional support in the coming year.

DID NOT MEET GRADE LEVEL

No basic understanding of course expectations is shown—student may need significant support in the coming year.

Maximize Time During Parent Teacher Conferences

Sample questions to ask the teacher:

- What do you see as my child's strengths?
- What does my child seem to be most interested in at school?
- Does my child get along well with his or her classmates?
- What is the most important thing that I can be doing to prepare my child for high school?
- Is my child giving his or her best effort?
- What could my child be doing that he or she is not already doing?
- What do you think are the biggest challenges for my child, and how can I help him or her with those challenges?

Performance: 8th Grade

RESOURCES TAILORED FOR ABHIRAJ

Reading Language Arts

Strategies to improve your child's grade 8 reading language arts understanding

Reading

- Help your child to come up with a question about a topic of interest to him or her. Then work together to identify a variety of texts that might contain answers to the question. Guide your child in using electronic sources and printed magazines, books, and newspapers to find the answer.
- Provide your child with fiction books on topics of interest to him or her. Read the books independently or together. In your conversations about the books, focus on plot development, different points of view, and use of figurative language.

Writing

- Ask your child to identify a current event that he or she finds interesting. Have your child write a summary of what has occurred, including a clear thesis statement and descriptions of at least three key details. Tell your child to incorporate at least three text or graphic features in his or her summary, such as subheadings or a table.
- Have your child write a letter to convince you to buy something for him or her. The letter should persuade you to buy the item by including the reasons it is important and why your child deserves it.

Mathematics

Strategies to improve your child's grade 8 math understanding

Numerical Representations and Relationships

- Have your child find a number between 100 and 225 and approximate the square root of that number.
- Have your child find numbers in everyday life and have him or her categorize them as real numbers, integers, etc.

Computations and Algebraic Relationships

- When taking a trip, whether to the store or on vacation, have your child create a map indicating how long it will take to travel a quarter of the way, half way, three quarters of the way, and all the way there. Have him or her compare these times to the actual time it takes.

Geometry and Measurement

- Have your child find the volume of an everyday object, such as a can of soup.
- Have your child measure the length and the diagonal of a table and use the Pythagorean theorem to find the width.

Data Analysis and Personal Financial Literacy

- Have your child find the amount of simple interest that is earned when a certain amount of money is invested at a percentage for one year.
- Have your child locate or create scatterplots from everyday events and draw a trend line beginning at (0,0) through the data points and make a prediction about data not represented by a point plotted on the graph.

Here are some books that are within ABHIRAJ's reading complexity range as measured by Lexile. Depending on ABHIRAJ's interest and what you determine is appropriate for your family, these may be good options to encourage your child to read more.
